**IMPLEMENTATION OF THE IASB POLICY RELATED TO THE IFRS
ACCOUNTING TREATMENT OF CONVERTIBLE BONDS
DENOMINATED IN A FOREIGN CURRENCY**

**NOTICE OF AN EXTRAORDINARY GENERAL MEETING ON
NOVEMBER 16th 2005**

Paris October 17th, 2005

Following the confirmation of the IASB (International Accounting Standards Board) policy published on 30 September 2005 in relation to the accounting treatment under the IFRS regime for convertible bonds denominated in a foreign currency, the CGG Group is required to change the accounting treatment of its 7.75% USD 85 million convertible bonds due 2012, issued on 4 November 2004.

This change in accounting treatment has an impact on the Group consolidated accounts dated 31/12/04 and 30/06/05 published under IFRS. It had been presented by the Group both in principle and in terms of the estimated potential consequences on the accounts, in the notes to the IFRS consolidated accounts on 30/06/05 published on 8 September 2005 (note 1: Accounting Principles, Rules, et Method - Point 11).

The effects of this new accounting treatment are:

- in relation to the balance sheet, the reclassification under « other non-current liabilities » of the component of the convertible bonds originally recorded in shareholders' equity for an amount of 10 M€, and the classification in each reporting period under « other non-current liabilities » of the present value of the share option contained in the convertible bonds,

- in relation to the profit and loss account, from one statement to the next, the recording of the variation of the present value of the share option contained in the convertible bonds.

Taking into account at the same time the increase in the CGG share price over this period and the strengthening of the US dollar against the euro, the value of the share option contained in the convertible bonds has increased very substantially over the period to approximately 34M€ on 31/12/04, approximately 49M€ on 31/03/05, approximately 49M€ on 30/06/05 and approximately 72M€ on 30/09/05.

The accounting of these amounts as liabilities under « other non-current liabilities » requires the Group from that time to recognize in its profit and loss accounts additional financial expenses of approximately 24M€ for fiscal year 2004, of approximately 15M€ for the period of three months ending 31/03/05, of approximately 15M€ for the period of six months ending 30/06/05, and of approximately 38M€ for the period of nine months ending 30/09/05.

These accounting adjustments, due solely to the application of the IASB policy as confirmed on September 30th 2005, have no effect on the Group operating income, or on cash flows.

- & -

The Board of Directors of CGG has decided to call an Extraordinary General Meeting of its shareholders on 16 November 2005 for the purposes of approving a change to the terms and conditions of its 7.75% USD 85 million convertible bonds due 2012, issued on 4 November 2004. The proposed change consists of granting to the bondholders the right to a cash payment upon immediate conversion of the bonds. This right shall be exercisable during a period of two calendar days following notification thereof from the Group. The proposed change will have been submitted for prior approval at a general meeting of the bondholders held on 2 November 2005.

The early conversion of all or part of these convertible bonds would permit the CGG Group to immediately strengthen its equity position and reduce its future financial charges. If 100% of the convertible bonds were converted, the cash payment should amount to USD 13 million, corresponding to less than twice the total amount of annual interest payments in respect of the bonds.

The Securities will not be registered under the Securities Act and may not be offered or sold in the United States absent registration or an applicable exemption from the registration requirements of the Securities Act.
